

LOG AND LUMBER HANDLING SYSTEMS

Stick Unscrambler Stacking System

FEATURES

The Mellott stick unscrambler and stick stacker system is designed to efficiently handle sticks when removed from drying lumber layers during the package breakdown.

The 2 chain bar type unscrambler with horizontal outfeed section is offered for 4 ft., 6 ft., 8 ft. sticks or as required.

The Stick Stacking System is modular and is offered with manual or automatic controls. Each system is custom designed to best fit the application.

Automatic Stick Stacking System Includes:

- (1) 2-Chain Bar Type Stick Unscrambler with 5 ft. 6 in. Elevated Section, 22 ft. Flat Section, Bump Plate, Stick Slide with Drive
- (1) 2-Chain Stick Rack Conveyor—32 ft. long with Drive
- (1) Automatic Control System

Custom built transfers and optional stick carts

Available with manual or automatic controls
