## LOG AND LUMBER HANDLING EQUIPMENT

### Overhead Gravity Pressure Roll

#### FEATURES

The Mellott Overhead Gravity Pressure roll is used behind a rip saw or planer to assist the feed of lumber onto a rooftop transfer.

#### SPECIFICATIONS

Overhead gravity pressure roll width options:  
24", 36", or 48" (custom sizes available)

Rolls—6-5/8" OD with 1-7/16" shafts and bearings

Height—34" +/- 1" with adjustable feet  
Length—24"

Drive Options:

Sumitomo reducer with 2 hp Electric Motor  
Hydraulic Drive  
2 hp Variable Frequency Drive

Speed—To be determined

Option:

Add air cylinder, valve and electric eye  
(Life expectancy of the overhead gravity pressure roll will be enhanced if the electric eye lowers the top roll onto the lumber as opposed to the lumber driving the top roll open. )
